PERSONAL STATEMENT

Electrical Engineering student at the University of Alberta with a growing focus on power systems, sustainable technology, and infrastructure development. Combines a strong foundation in mathematics, physics, programming, and engineering design with hands-on experience in fast-paced, structured work environments and public-facing roles. Comfortable turning abstract problems into practical, functional solutions, with strong technical communication and collaborative skills built through academic projects and professional experience. Seeking a summer opportunity in Calgary to contribute to a forward-thinking engineering team.

EDUCATION

University of Alberta | B.Sc. Electrical Engineering (Traditional Program) *Edmonton, AB | Sept 2026 – Present*

University of Lethbridge | Pre-Professional Engineering Transfer Program *Lethbridge, AB | Sept 2025 – Aug 2026*

Relevant Coursework: *Engineering Design • Engineering Mechanics (Statics) • Accelerated Calculus I & II • General Chemistry I & II • Fundamentals of Programming I • Waves, Optics and Sound • Writing for Engineering Students*

Sir Winston Churchill High School | High School Diploma *Calgary, AB | Sept 2022 – June 2024*

SKILLS

Technical: Engineering Design • Systems Thinking • Technical Reporting • Research & Analysis • Microsoft Office (Word, Excel, PowerPoint) • Fast learner of new tools and technical systems • Comfortable following technical procedures and safety protocols

Professional: Strong organizational skills • Teamwork and collaboration • Adaptability • Communication and presentation skills • Leadership • Multitasking • Attention to detail

Languages: English (Advanced) • Arabic (Fluent)

PROJECT

Medicine Cooler — *Portable Temperature-Controlled Medication Storage Concept*

- Designed a lightweight, budget-friendly concept for safely storing and transporting temperature-sensitive medication (e.g. insulin) within a 2°C–8°C range.
- Contributed to system design, enclosure and insulation planning, and overall concept layout, combining cooling, sensing, control, display feedback, and rechargeable power.
- Applied engineering design process and systems thinking to translate a real-world problem into a structured technical concept.

EXPERIENCE

Guest Ambassador – Event Security | The Calgary Stampede *Calgary, AB | July 2026 (1 mo)*

- Ensured the safety and security of event guests at a world-class gathering, helping maintain a positive and welcoming environment.
- Completed mandatory safety training and adhered to strict corporate policies on conduct, confidentiality, and professional standards.
- Contributed to the smooth operational running of a high-volume, fast-paced public event.

Sales Associate (Seasonal / Part-Time) | The Home Depot *Calgary, AB | April 2025 – July 2025*

- Performed assigned operational tasks in a fast-paced retail environment.
- Followed workplace safety procedures while handling equipment and materials.
- Assisted with daily operations across multiple departments as needed.
- Maintained reliability and consistency during scheduled shifts.

Stage Host / Guest Ambassador | Calgary Performance Arts Festival *Calgary, AB | April 2023*

- Hosted the stage for 20+ performers, introducing acts and managing transitions.
- Engaged an audience of 50+ attendees with clear, confident announcements.
- Handled unplanned situations professionally, ensuring 100% guest satisfaction.

Volunteer | Tuscany Community Association *Calgary, AB | October 2022*

- Supported event setup, takedown, and activities alongside a 20+ member staff team.
- Helped coordinate efficient cleanup and restoration within a strict 5-hour window.
- Organized and managed 10+ event items, supporting seamless execution for 100+ attendees.
