PERSONAL STATEMENT

Electrical Engineering student at the University of Alberta with a growing focus on power systems, sustainable technology, and infrastructure development. Combines a strong foundation in mathematics, physics, programming, and engineering design with hands-on experience in fast-paced, structured work environments and public-facing roles. Comfortable turning abstract problems into practical, functional solutions, with strong technical communication and collaborative skills built through academic projects and professional experience. Seeking a summer opportunity in Calgary to contribute to a forward-thinking engineering team.

EDUCATION

University of Alberta | B.Sc. Electrical Engineering (Traditional Program) *Edmonton, AB | Sept 2026 – Present*

University of Lethbridge | Pre-Professional Engineering Transfer Program *Lethbridge, AB | Sept 2025 – Apr 2026*

Relevant Coursework: *Engineering Design • Engineering Mechanics (Statics) • Accelerated Calculus I & II • General Chemistry I & II • Fundamentals of Programming I • Waves, Optics and Sound • Writing for Engineering Students*

Sir Winston Churchill High School | High School Diploma *Calgary, AB | Sept 2022 – June 2024*

SKILLS

Technical: Engineering Design • Systems Thinking • Technical Reporting • Research & Analysis • Microsoft Office (Word, Excel, PowerPoint) • Fast learner of new tools and technical systems • Comfortable following technical procedures and safety protocols

Professional: Strong organizational skills • Teamwork and collaboration • Adaptability • Communication and presentation skills • Leadership • Multitasking • Attention to detail

Languages: English (Advanced) • Arabic (Fluent)

PROJECT

Medicine Cooler — *Team Engineering Design Project • ENGG 1600, University of Lethbridge*

- Four-person team project: a smart cooler holding medication such as insulin at a 2°C–8°C target (ESP32, DS18B20 sensor, OLED, relay-switched Peltier cooling stage, buzzer).
- Wrote the ESP32 firmware (Arduino/C++): temperature sensing, OLED readout, threshold relay control, and an escalating buzzer alert.
- Designed the seven-part 3D-printed enclosure in CAD, assembled the Peltier cooling stage, and bench-tested the full system with an ice-water setup.

EXPERIENCE

Junior Executive – Clubroom Coordinator | University of Alberta EE Club *Edmonton, AB | Sept 2026 – Present*

- Support the club's merchandise portfolio, developing ideas and coordinating designs with student interest in mind.
- Collaborate with the executive team on initiatives that engage the Electrical Engineering student community, building experience in planning and student leadership.

Guest Ambassador – Event Security | The Calgary Stampede *Calgary, AB | July 2026 (1 mo)*

- Ensured the safety and security of event guests at a world-class gathering, helping maintain a positive and welcoming environment.
- Completed mandatory safety training and adhered to strict corporate policies on conduct, confidentiality, and professional standards.
- Contributed to the smooth operational running of a high-volume, fast-paced public event.

Sales Associate (Seasonal / Part-Time) | The Home Depot *Calgary, AB | April 2025 – July 2025*

- Performed assigned operational tasks in a fast-paced retail environment.
- Followed workplace safety procedures while handling equipment and materials.
- Assisted with daily operations across multiple departments as needed.
- Maintained reliability and consistency during scheduled shifts.

Stage Host / Guest Ambassador | Calgary Performance Arts Festival *Calgary, AB | April 2023*

- Hosted the stage for 20+ performers, introducing acts, managing transitions, and handling unplanned situations professionally.
- Engaged an audience of 50+ attendees with clear, confident announcements.

Volunteer | Tuscany Community Association *Calgary, AB | October 2022*

- Supported event setup, takedown, and activities alongside a 20+ member staff team.
- Coordinated cleanup and restoration within a strict 5-hour window while organizing 10+ event items for 100+ attendees.
